

New green furniture installed along a section of main street

The \$3.8 million Proserpine Main Street Upgrade will reinvigorate and improve the main street of Proserpine and entryways from the Bruce Highway. The upgrade will improve footpaths, points of entry, landscaping, street furniture and signage.

Latest News

Construction underway

Works have begun along the main street near Blair Street and Fuljames Street, to replace existing footpaths with new exposed aggregate concrete footpaths.

Landscaping works have also begun at the centre islands near the Bruce Highway and BP Service Station. The islands are currently being excavated and will be restored with new irrigation, trees and entry signs leading into Proserpine.

New green street furniture has been fitted between Herbert Street and Chapman Street, showcasing the new seats, bollards and bins to be installed along the length of the main street throughout the upgrade.

Construction times

Works will generally take place between the hours of 6am – 6pm, Monday to Friday. Occasionally, works may be completed out of hours and on weekends. The project is expected to be completed in mid-2020.

Christmas trading period

Council may not undertake any disruptive footpath works during December in the lead up to Christmas, to minimise the impact on main street businesses. Minor landscaping and furniture installation works will take place from 1 December.

Regular communication during works

Regular updates will be provided to business owners throughout the project, with monthly newsletters, regular emails and face-to-face updates. The latest information will be made available on Council's website and Facebook page.
